PACT SCHOOLS

Every student. Cleared for clinicals.

Students upload immunizations, TB, CPR and forms from their phone. Every upload is reviewed within 24 hours, students are reminded before anything expires, and each clinical site gets its proof in one link.

The real Pact portal: your dashboard (left) and what a student sees on their phone (right).

How it works

1 Send us your list
Your requirements and roster in any format. We set up your programs for you.

2 Students upload
From their phone, with no app to install. They register in about 3 to 5 minutes.

3 Pact checks each one
Every upload is reviewed within 24 hours. If one is sent back, the student sees why.

What Pact keeps for every student

Immunizations & TB
MMR, varicella, hepatitis B, Tdap, flu and COVID records or titers, and TB by skin test, blood test or chest X-ray.

CPR, insurance & forms
BLS cards, insurance cards, handbooks and site forms, each dated so you know when it runs out.

Your rules, per program
Each program sets its own requirements, deadlines and clinical sites.

One link per clinical site
Only the students you choose, with an access code and an end date. Every view is logged.

Reminders at 30, 14, 7 days
Students get email reminders before anything expires or comes due.

Drug tests & background checks
Ordered in the portal. Results go only to the people at your school who need them.

$30
per student, one time

- No monthly fee
- Students pay online
- Tracking never renews
- Or one school invoice

support@pactcompliance.com · pactcompliance.com/schools

For colleges, universities, technical colleges and hospital-based programs with clinical rotations: nursing, radiography, EMT, surgical technology, medical assisting, dental hygiene, respiratory care, PTA, OTA, sonography, medical lab and more. Not for K-12 schools. Your program decides who is cleared for clinicals. Drug test and background check results are never part of Pact Compliance Review. Screens are from the demo school (made-up students).
